The background of the entire cover is a detailed wood-grain pattern in shades of brown and tan. Overlaid on this are various botanical illustrations in a dark brown ink. These include a tulip, a daisy, a cornucopia overflowing with produce, a beehive, a basket of flowers, a bunch of grapes, a strawberry plant, and several other types of flowers and leaves. A large, thin-lined circle is centered on the page, framing the main title and subtitle.

100% Pure Essential Oils

Essential oils are often used in aromatherapy, a form of alternative medicine that employs **plant extracts** to support health and well-being.

They can be **inhaled** or **diluted** to be applied to the skin. They stimulate your sense of smell and may have **medicinal effects** when absorbed.

Inhaling the aromas from essential oils can stimulate areas of your limbic system, which is a part of your brain that plays a role in **emotions, behaviors, and long-term memory**.

Many studies have shown that the smell of some essential oils can help to ease feelings of **anxiety** and **stress**, as well as helping with **poor sleep habits**, or fighting **bacteria** and viruses, helping to boost the **immune system** and preventing illness. Essential oils can be added to water in diffusers and oil burners, or diluted in carrier oils (such as coconut oil or almond oil) to apply them to the skin or a bath. They can also be used for **beauty** products and **cleaning** products.

All caps are plastic free and the bottles contain 10ml of pure essential oils, unless differently stated.
